

ROYAL BAKING POWDER
Absolutely Pure.

This powder is made from a natural pure, strong and wholesome. More economical than the ordinary kind, and cannot be sold in combination with the adulterated low test weight, inferior or cheapened powders. Sold only in cans.

ROYAL BAKING POWDER CO., NEW YORK.

NOTICE TO CREDITORS—County Court of Rock County. In the matter of the estate of Henry W. Rogers, deceased.

Letters of administration having been issued this day to L. D. Jerome, and the time for creditors to present their claims for allowance having been limited to the fourth day of December next, inclusive, notice is hereby given that this court, at the office of the County Judge, in the city of Janesville, in this county, at the next December term, to be held on the fourth day of December, next, at 10 o'clock a. m., will receive, examine and adjust all claims and demands of all persons against said deceased. Dated April 18, 1883.

By the Court, AMOS P. RICHARD, County Judge.

NOTICE TO CREDITORS—County Court of Rock County. In the matter of the estate of Robert Peters, deceased.

Letters of administration having been issued this day to Samuel C. Cobb and the time for creditors to present their claims for allowance having been limited to the fourth day of December next, inclusive, notice is hereby given that this court, at the office of the County Judge, in the city of Janesville, in this county, at the next December term, to be held on the fourth day of December, next, at 10 o'clock a. m., will receive, examine and adjust all claims and demands of all persons against said deceased. Dated April 18, 1883.

By the Court, AMOS P. RICHARD, County Judge.

CIRCUIT COURT ROCK COUNTY—Samuel C. Cobb, plaintiff, against Clara E. Prosser, widow of J. B. Prosser, deceased, Anna M. Prosser, and Charles Prosser, his wife, David H. Prosser, and Alice Prosser, his wife, and Edgar H. Doty, defendants.

Plaintiff by writ of a judgment of foreclosure and sale, made and returned in the Circuit Court for Rock County in the above entitled action, on the 18th day of June, A. D. 1883, in favor of the above named plaintiff, and against the above named defendants, and will offer for sale and sale at public auction, to the highest bidder, in the city of Janesville, in said county, at the front door of the Court House, in said county, on the 21st day of May, A. D. 1883.

On Monday, the 21st day of May, A. D. 1883, at 10 o'clock in the forenoon, of that day, at said certain place, parcel or tract of land, state, lying and being so described as follows: To wit: Lot number one (1) in block number thirty-eight (38) in the original plat of the village of Janesville, in said county, there or so much thereof as may be required to raise the amount due to the plaintiff for principal, interest, costs and attorneys fees and disbursements in the aforesaid action, as provided in said judgment, and which may be sold separately without injury to the rights of the plaintiff. Dated March 31, 1883.

H. B. HARPER, Sheriff of Rock Co.

NOTICE TO CREDITORS—County Court of Rock County. In the matter of the estate of Lucy C. L. Whitall, deceased.

Letters of administration having been issued heretofore to Wm. H. Whitall, and the time for creditors to present their claims for allowance having been limited to the fourth day of December next, inclusive, notice is hereby given that this court, at the office of the County Judge, in the city of Janesville, in this county, at the next December term, to be held on the fourth day of December, next, at 10 o'clock a. m., will receive, examine and adjust all claims and demands of all persons against said deceased. Dated April 18, 1883.

By the Court, AMOS P. RICHARD, County Judge.

COUNTY COURT, ROCK COUNTY—In the matter of the Guardianship of the minor heirs of Henry Peters, deceased.

On reading and filing the petition of Charles Tall, general guardian of said minors, representing that the said minors are of certain real estate in this county, and that it is necessary that a portion of the same should be sold, and praying for license to sell the same, and it appearing to the court that said petition is in conformity with the law, and that it is necessary to the said minors to sell a portion of said real estate, ordered and decreed that the next of kin to said minors, and all persons interested in said estate, appear before this court at a special term to be held on the 11th day of May, next, at 10 o'clock a. m., at the office of the County Judge, in the city of Janesville, in said county, to show cause why license should not be granted for the sale of said real estate, according to the prayer of said petition. And it is further ordered that a copy of this order be published for at least five days in the Janesville Gazette, a daily newspaper published at said city. Dated April 18, 1883.

By the Court, AMOS P. RICHARD, County Judge.

HOSTETTER'S STOMACH BITTERS
CELEBRATED

What the restorative, Hostetter's Stomach Bitters, will do, must be gathered from what it has done. It has effected radical cures in thousands of cases of dyspepsia, bilious disorders, intermittent fever, nervous affections, general debility, constipation, sick headache, neuralgia, rheumatism, and the peculiar complaints and disabilities to which the feeble are subject.

For sale by all Druggists and Grocers generally.

ALYON & HEALY
State & Monroe Sts., Chicago.

BAND CATALOGUE
of Instruments, Solo, Chorus, and Band Music. Sent free on application.

Jan 1883

Deaths in the United States.

According to the last census, 750,893 persons died in the United States during 1880. The death rate for the whole Union was, therefore, 15.1 to the 1,000. This is a low rate, and yet it was much higher than that given in 1870, which was only 12.8 per 1,000, while the death rate, according to the census of 1860, was 12.5.

But the apparent increase in 1880 was due entirely to more complete returns of deaths, and even the figures for that year cannot be regarded as accurate. Except in a comparatively small number of communities, vital statistics are not gathered in the United States after a scientific system. The actual mortality of the Union is probably somewhere between eighteen and nineteen per 1,000, instead of a little over fifteen. But that is a low rate as compared with European countries, the death rate for the whole of England having been 20.6 per thousand in 1880, and for Scotland 21.3 in 1878.

Of the 756,893 deaths recorded in the census returns, 640,191 were of whites, out of a total white population of 43,409,970, and 116,702 of negroes, out of a total colored population of 6,782,818. The apparent death rate, therefore, was 14.74 among the whites, and 17.38 among the negroes.

A greater percentage of mortality among colored infants in the Southern States largely explains the higher negro death rate, which must be accepted as proved, we suppose, since, deficient as the mortality statistics among the whites may be, there is good reason for regarding the returns of negro mortality as still more incomplete.

Of the deaths reported, 391,960 were of males and 364,933 of females, the total living population having been 25,618,820 males and 24,680,636 females. For every 1,000 deaths of females there were 1,074 of males.

The proportion of males dying in infancy was also greater than that of females. Of the 390,614 males who died, 163,850 were under 5 years of age, while of the 363,874 females who died 138,926 were under 5 years; that is, the proportion of deaths under 5 years of age to all deaths recorded was 41.51 per 1,000 among males, while among females it was only 38.18. Nearly half the male mortality was among very young children.

The causes of death were reported in only 738,840 cases, and the following table gives the number of deaths from each of the ten principal causes:

| | |
|------------------------------------|--------|
| Consumption | 91,531 |
| Illfebrile diseases | 3,308 |
| Diarrheal diseases | 6,202 |
| Diseases of nervous system | 8,260 |
| Diseases of the respiratory organs | 10,004 |
| Diseases of digestive system | 10,004 |
| Epilepsy (typhoid) fever | 2,000 |
| Malaria | 1,000 |
| Scarlet fever | 1,000 |
| Whooping cough | 1,000 |

Consumption was, as always, the great scourge, and it carried off a considerably larger proportion of females than males, the deaths from that cause being 40,619 males to 50,912 females. It is very instructive to observe that the mortality from consumption in the North Atlantic and Lake regions was highest in the small towns and agricultural districts, while on the Gulf coast it was greatest in the city of New Orleans, with its wretched sewerage and drainage system.

Enteric or typhoid fever is also more especially a disease of the country, rather than the city. The better drainage which ordinarily prevails in the large towns makes them less liable to that fever than the smaller communities, and scattered settlements where necessary precautions against the pollution of the water supply are not generally taken, and accumulations of filth in vaults and cesspools are common. Malarial fevers, likewise, were more prevalent and more fatal, proportionately, in the smaller communities than in the great cities. The same was the case with diphtheria.

The great city, especially since the increase of sanitary knowledge, has many advantages over the country with respect to health. It has a crowded population, it is true, but its comparatively confined air may be less injurious to the inhabitants than that which sweeps over an open country, where it may wait poison from swamps and marshes, and where a scientific system of sewerage and drainage is hardly practicable.

The report of the number of deaths due to accidents and injuries is interesting:

| | |
|------------------------------|-------|
| Burns and scalds | 4,784 |
| Drowning | 4,320 |
| Exposure and neglect | 1,230 |
| Guns and wounds | 1,230 |
| Homicide | 1,230 |
| Infanticide | 1,230 |
| Intoxication | 1,230 |
| Self-inflicted wounds | 1,230 |
| Substitution | 1,230 |
| Unlabeled accidents | 1,230 |
| Suffocation | 1,230 |
| Suicide by hanging | 1,230 |
| Suicide by poison | 1,230 |
| Suicide by other means | 1,230 |
| Struck by lightning | 1,230 |
| Struck by falling objects | 1,230 |
| Struck by moving vehicles | 1,230 |
| Struck by machinery | 1,230 |
| Struck by fire | 1,230 |
| Struck by other means | 1,230 |
| Other accidents and injuries | 1,230 |

The mortality tables in the Compendium of the Census are comparatively meager, not giving us sufficient data on which to base the general conclusions we would like to draw. We are promised, however, further and more detailed statistics in the full report—that is, a long time hence.—N. Y. Sun.

Deaths in the United States.

Of the 756,893 deaths recorded in the census returns, 640,191 were of whites, out of a total white population of 43,409,970, and 116,702 of negroes, out of a total colored population of 6,782,818. The apparent death rate, therefore, was 14.74 among the whites, and 17.38 among the negroes.

The mortality tables in the Compendium of the Census are comparatively meager, not giving us sufficient data on which to base the general conclusions we would like to draw. We are promised, however, further and more detailed statistics in the full report—that is, a long time hence.—N. Y. Sun.

Deaths in the United States.

Of the 756,893 deaths recorded in the census returns, 640,191 were of whites, out of a total white population of 43,409,970, and 116,702 of negroes, out of a total colored population of 6,782,818. The apparent death rate, therefore, was 14.74 among the whites, and 17.38 among the negroes.

A greater percentage of mortality among colored infants in the Southern States largely explains the higher negro death rate, which must be accepted as proved, we suppose, since, deficient as the mortality statistics among the whites may be, there is good reason for regarding the returns of negro mortality as still more incomplete.

Of the deaths reported, 391,960 were of males and 364,933 of females, the total living population having been 25,618,820 males and 24,680,636 females. For every 1,000 deaths of females there were 1,074 of males.

The proportion of males dying in infancy was also greater than that of females. Of the 390,614 males who died, 163,850 were under 5 years of age, while of the 363,874 females who died 138,926 were under 5 years; that is, the proportion of deaths under 5 years of age to all deaths recorded was 41.51 per 1,000 among males, while among females it was only 38.18. Nearly half the male mortality was among very young children.

The causes of death were reported in only 738,840 cases, and the following table gives the number of deaths from each of the ten principal causes:

| | |
|------------------------------------|--------|
| Consumption | 91,531 |
| Illfebrile diseases | 3,308 |
| Diarrheal diseases | 6,202 |
| Diseases of nervous system | 8,260 |
| Diseases of the respiratory organs | 10,004 |
| Diseases of digestive system | 10,004 |
| Epilepsy (typhoid) fever | 2,000 |
| Malaria | 1,000 |
| Scarlet fever | 1,000 |
| Whooping cough | 1,000 |

Consumption was, as always, the great scourge, and it carried off a considerably larger proportion of females than males, the deaths from that cause being 40,619 males to 50,912 females. It is very instructive to observe that the mortality from consumption in the North Atlantic and Lake regions was highest in the small towns and agricultural districts, while on the Gulf coast it was greatest in the city of New Orleans, with its wretched sewerage and drainage system.

Enteric or typhoid fever is also more especially a disease of the country, rather than the city. The better drainage which ordinarily prevails in the large towns makes them less liable to that fever than the smaller communities, and scattered settlements where necessary precautions against the pollution of the water supply are not generally taken, and accumulations of filth in vaults and cesspools are common. Malarial fevers, likewise, were more prevalent and more fatal, proportionately, in the smaller communities than in the great cities. The same was the case with diphtheria.

The great city, especially since the increase of sanitary knowledge, has many advantages over the country with respect to health. It has a crowded population, it is true, but its comparatively confined air may be less injurious to the inhabitants than that which sweeps over an open country, where it may wait poison from swamps and marshes, and where a scientific system of sewerage and drainage is hardly practicable.

The report of the number of deaths due to accidents and injuries is interesting:

| | |
|------------------------------|-------|
| Burns and scalds | 4,784 |
| Drowning | 4,320 |
| Exposure and neglect | 1,230 |
| Guns and wounds | 1,230 |
| Homicide | 1,230 |
| Infanticide | 1,230 |
| Intoxication | 1,230 |
| Self-inflicted wounds | 1,230 |
| Substitution | 1,230 |
| Unlabeled accidents | 1,230 |
| Suffocation | 1,230 |
| Suicide by hanging | 1,230 |
| Suicide by poison | 1,230 |
| Suicide by other means | 1,230 |
| Struck by lightning | 1,230 |
| Struck by falling objects | 1,230 |
| Struck by moving vehicles | 1,230 |
| Struck by machinery | 1,230 |
| Struck by fire | 1,230 |
| Struck by other means | 1,230 |
| Other accidents and injuries | 1,230 |

The mortality tables in the Compendium of the Census are comparatively meager, not giving us sufficient data on which to base the general conclusions we would like to draw. We are promised, however, further and more detailed statistics in the full report—that is, a long time hence.—N. Y. Sun.

Office: Myers' new block, Janesville, Wis.

Lock Box 211.

BRIEFINGS.

—May day.

—Don't forget the skating rink this evening. There will be a good bill of fare.

—The ice season has commenced, there will be no trouble in keeping cool, as ice is plenty and cheap.

—Western Star Lodge No. 14, F. and A. M., meet in Masonic hall this evening. Work in the third degree.

—Janesville City Lodge No. 30, I. O. O. F., will hold their regular weekly meeting in Odd Fellows' hall this evening.

—The common council appointed ex-Mayor T. T. Croft chief engineer of the fire department, last evening, upon the recommendation of the fire department.

—A good many boys went up to Milton.

—Mr. J. H. Bliss is laid up to-day, on account of receiving a severe wound on the leg by a nail, which was protruding from a hoghead of crockery he was handling a few days since.

—This morning to see the circus parade, and several other ones will visit that village this evening to witness the second performance.

—City Clerk Church is somewhat annoyed by the reports of irresponsible parties that he has been instructed by the common council to see that the license law is strictly enforced.

—The circuit court was engaged this afternoon hearing the arguments on a motion for suit money in the divorce case of Love vs. Love, the juryman being excused until to-morrow morning.

—Notwithstanding the large crowd of people on the streets last night, and the exhibition of the circus and menagerie, no arrests were made by the police. The city was very quiet and orderly.

—Dr. M. A. Newman has changed his residence from the fourth ward to the third, occupying the house on South Main street formerly owned by Dr. Smith, one door north of Mr. C. B. Conrad.

—Mr. R. W. Cheever has purchased the Clinton Herald, and will hereafter be the sole editor and proprietor. Mr. W. C. Brown, the former proprietor, goes to Le Beau, Dakota, where he has already established a paper.

—The sale of reserved seats for Keene's performance of *Richelieu*, will begin to-morrow morning at Prentice & Benson's. Also the sale of seats for *Black Crook* to be given on Saturday evening, will begin at the same time.

—There were fourteen interments in Oak Hill cemetery during the month of April, three of whom were non-residents. For the corresponding month one year ago the number of interments was twelve.

—Little Mattie Stoddard is entertaining a large number of her friends this afternoon at the home of her parents, Mr. and Mrs. W. B. Stoddard, on Bluff street, second ward, the occasion being Mattie's seventh birthday. The little ones are having a merry time.

—Mrs. S. M. Amsdem, formerly of this city, who recently went to Chicago to accept a position in a leading millinery establishment, is lying dangerously ill in that city, of pneumonia. Dr. Treat is attending her, and the latest advices say that she is at the point of death, her physician having given up hope of her recovery.

—The common council granted forty-two saloon licenses last evening, seventeen of which are located on the east side of the river, and twenty-five on the west side. They are distributed among the following wards as follows: First ward, eighteen; second ward, eleven; third ward, six; fourth ward, three, and fifth ward, four.

—Friday evening at Mrs. Binliff's musical Miss Phoenix, a member of the Apollo Club, of Chicago, will take a prominent part in speaking of her "Eye" of Bloomington, Illinois, says: "Miss Phoenix possesses a voice of rare sweetness and sympathetic quality of tone. No contralto excepting Annie Louise Cary has been heard here with such genuine satisfaction."

—Charles Deidrick (not Betrick as heretofore given) was charged with the municipal court, to-day, before with stealing a horse from Patrick Carney on April 19, and waving an examination, he was committed to await further proceedings. He appears to be a half-witted boy, and not understanding the consequence of the crime he had committed, Judge Patten wrote a letter to parties at Koshkonong, this afternoon, that his brother and father might be informed of the affair, and if they deemed proper, to assist him, in his trial.

—Postoffice Inspector J. D. King made a thorough examination of the books and vouchers of the Janesville postoffice yesterday, and found every particular pertaining thereto in a most satisfactory condition. There wasn't a cent of a debt, and the accounts were kept in admirable shape, so that his report to the postoffice department at Washington he will be able to say, and will say, that the accounts are kept in a manner not excelled by any other office in his jurisdiction. Miss Louise Peterson, who has been assistant postmaster for some time and has been in the office for many years, has particular charge of the books, and it is only justice to say that it is through her ability and untiring industry that order and correctness prevail in the Janesville postoffice. It also proves that all connected with the office have been efficient.

"Grant it out."

The above is an old saw as savage as it is senseless. You can't "grant out" dyspepsia, nor liver complaint, nor nervousness if they once get a good hold. They don't remove themselves in that way. The taking of a dose of *Burdock Blood Purifier* can cure them "grinding it out."

Wanted by Palmer & Stevens and Sherer & Co.

Old papers for sale at the Gazette counting room.

CITY GOVERNMENT.

Regular Meeting of the City Guardians Last Evening.

Forty-Two Saloon Licenses Granted in One Batch.

Ex-Mayor T. T. Croft Appointed Chief Engineer of the Fire Department.

Other Proceedings of the Council.

The common council held their first regular meeting of the new municipal year in the city hall last evening. His Honor, Mayor St. John, in the chair, and all the aldermen being present except Alderman Murdoch.

The journal of the last meeting was read and approved.

The sworn statement of the city treasurer, showing the condition of the revolving funds on April 27th, was as follows:

| | |
|--|-------------|
| Balance in school fund | \$4,216.29 |
| Balance in general fund | \$2,627.14 |
| Balance in fire department fund | 20.93 |
| Balance in highway, street and bridge fund | 1,153.20 |
| Balance in gas fund | 627.70 |
| Balance in judgment fund | 8.15 |
| Balance in bonded debt fund | 30.10 |
| Balance in license fund | 1,238.33 |
| Balance in transferred fund | 380.83 |
| Balance in first ward fund | 21.28 |
| Balance in second ward fund | 23.87 |
| Balance in third ward fund | 21.28 |
| Balance in fourth ward fund | 49.47 |
| Balance in fifth ward fund | 9.87 |
| Balance in miscellaneous fund | 335.06 |
| Balance in terrace street grading fund | 129.71 |
| Balance in South Bluff street fund | 129.71 |
| Total | \$11,151.30 |

The statement was referred to the finance committee, and after being examined, it was accepted on motion of Ald. Smith, and placed on file.

The bonds of the city assessors, Messrs. Ed. Connel, and S. L. James, were referred to the judiciary committee, who reported them back as in due form, satisfactory good, and on motion of Ald. Palmer, were approved.

The bonds and applications for saloon license of the following parties were read and referred to the judiciary and license committees.

David Myers, 63 North Main street.

William Silito, 69 North Main street.

Max Pfanning, corner of Academy and Wall street.

J. G. Todd, end of bridge East Milwaukee street.

Joseph Connors, 63 West Milwaukee street.

Minick & Geeser, 12 North Main street.

John Keyvon, Badger Hotel, Academy street.

Julia Concanon, corner Academy and West Milwaukee street.

John Ehringer, South River street.

O. E. Smith, Swiss saloon, Franklin street.

John Schicker, Church's block Franklin street.

Anton Behrendt, Union hotel, North First street.

John Speuce, City hotel, North Main street.

Wm. Suddler, opera house saloon, East Milwaukee street.

John Livingston, Myers house saloon, East Milwaukee street.

Joe Hofmaster, 30 East Milwaukee street.

Erud B. Jones, Welch building, East Milwaukee street.

William Canary, Pleasant street.

A. C. Beider, 62 North Main street.

Geo. L. Hackleman, 62 West Milwaukee street.

James Ryan, 72 West Milwaukee street.

Wm. Cunningham, 35 West Milwaukee street.

L. Wyler, 22 East Milwaukee street.

Wm. Veley, 14 West Milwaukee street.

Thomas Welch, corner Marion and West Milwaukee street.

John Boub, Tallman's block, River street.

Ben. George, 75 West Milwaukee street.

J. and A. W. Bauman, North River street.

S. Reynolds, Grand hotel, West Milwaukee street.

George W. Shaw, 49 North Main.

A. A. Vinyan, 24 East Milwaukee street.

J. Heller, North river street.

Thomas Mackin, 79 West Milwaukee street.

Zienow & Blunk, 24 West Milwaukee street.

James P. Worthington, 54 North Main street.

Robert Ritter, Northwestern house, Academy street.

M. J. Sullivan, 70 West Milwaukee street.

J. Snyder, Pember house, Bluff street.

J. E. McDonald, 111 West Milwaukee street.

Brooks & Murphy, North River street.

Thomas Graham, Farmers' hotel, East Milwaukee street.

Wm. Hemming, 55 West Milwaukee street.

Ald. Palmer, of the judiciary committee reported the bonds in due form and satisfactory good, and on motion of Ald. Daly, the applications were granted, and the clerk ordered to issue the license.

On motion of Ald. Potter, of the fire department committee, T. T. Croft was appointed as chief engineer of the fire department.

On motion of Ald. Smith the clerk was authorized to issue orders on the treasury for all city officers, where the salaries have been fixed by the council, when the same shall become due, without further action of the common council.

Ald. Potter introduced an order for a culvert across Jackson street, on the north side of Wall, which was adopted.

The clerk was instructed to cause the council chamber and city offices to be thoroughly cleaned and renovated before the next regular meeting of the council.

On motion of Ald. Field, the culverts on South Main street were ordered repaired.

On motion of Ald. Field, the city marshal was instructed to see that the license law is strictly enforced.

On motion of Ald. Potter the license of Burr Robbins' Great American and German allied shows was remitted.

Ald. Lennartz moved that the council

proceed to elect a physician to the board of health. Lost.

The council then adjourned.

THE CIRCUS.

The Benefit Performance of Burr Robbins' Great American and German Allied Show a Great Success.

The exhibition given by Burr Robbins' Great American and German Allied show for the benefit of the free library, last evening, was a great success in every particular. The mammoth tents of the exhibition were well filled with people, and the seating capacity of the circus pavilion was crowded, many being compelled to content themselves with standing room during the entire circus performance. This being the first performance of the season, everybody expected there would be many delays, and that the performance would not be up to the average, but in this they were disappointed. From the commencement of the ring performance until its close, everything moved along with the precision of a well drilled corps of performers; there were no hitches or delays, and the ring performance, most of which was new, was first class in every respect; the equestrian display was really fine, while the contortionists were the best seen in this city for a long time. The ground and jolly tumbling, the trick dogs, the performing elephants and the stud of imported Barboues ponies, were witnessed with great interest by the throng of spectators, and each act received well merited applause. The plate spinning and light balancing was a new act and was well received by the audience. In fact the entire ring performance was of a high order and the different performers did their parts well, notwithstanding it was the first night of the season under canvas.

The manager drew the attention of all in the early evening. The large collection of rare animals, in their new and highly finished dens, were greatly admired, and the large crowd lingered around the dens until they were closed for the evening.

Colonel Robbins starts out this season with the largest show on wheels in this country; he has not spared expense when looking for new curiosities to amuse the people, and he now possesses a wonderful collection of natural curiosities in his menagerie, among them are many specimens which are not to be seen with any other exhibition. He has the largest living hippopotamus in America, which alone is worth the price of admission to see. The giant horse, the largest in the world, and the smallest pony. The menagerie is complete, and on a whole, the Great American and German Allied show is no humbug, but just what it is represented to be—no ladies and no less.

The money connected with the free library enterprise must have realized a handsome sum of money by the entertainment so generously given them by Colonel Robbins last evening, the exact amount is not yet known, but the figures have been placed as high as \$1,500, which will not be far out of the way.

There were about one thousand eight hundred tickets taken at the door, four hundred of which were sold at the ticket wagon in the evening, but this cannot be taken as a correct basis of the amount realized, as there were many tickets sold which were not used, people buying them for the purpose of benefiting the library, not intending to visit the show.

The ladies will hold a meeting in a day or two, or as soon as they obtain a little rest from the hard labor of the past week, when the full report will be made public through the press.

Personal.

—Miss Mary Howe, of Danvers, Massachusetts, is in the city visiting her aunt Miss M. E. Gould.

—C. D. Hildebrand, who was for 30 years a criminal, and an outlaw for five years with Jesse James (and three years with the Younger brothers, was in the city to-day, making arrangements to lecture at Myers opera house, on Sunday evening.

—Mrs. H. A. Patterson, wife of Postmaster H. A. Patterson, returned home this afternoon from Hornellsville, New York, where she has been during the past winter visiting her mother. Mr. Patterson went to Chicago on Friday last for the purpose of meeting Mrs. Patterson, returning with her this afternoon.

—From the state Journal of Monday, opens the season in that city this evening, by giving a benefit show, the entire proceeds of which he generously donates towards the establishment of a free public library. Robbins is a whole-souled, generous hearted, public spirited citizen, whose benefactions are always upon a broad-gauged scale, and who is a credit to his race.

Among the Dead.

The following is a list of the interments in Oak Hill cemetery during the month ending April 30, 1883:

April 2—Mrs. Ella Tracy, town of Center, aged 26 years.

April 2—Julia McKee, Chicago, aged 1 year and 3 months.

April 3—Infant child of Charles Stark, Janesville.

April 4—Mrs. Jennie Slyfield, Baraboo, aged 33 years.

April 9—Dr. James F. Halliwell, Janesville, aged 55 years.

April 15—Wm. W. German, Janesville.

April 16—Edward Barry, Janesville, aged 53 years.

April 17—William A. Richardson, Janesville, aged 17 years.

April 20—L. P. Standard, town of Janesville, aged 39 years.

April 23—Lydia S. Spaulding, Janesville, aged 75 years.

April 24—Jeremiah Deth, Janesville, aged 77 years.

April 25—Amelia Bartha Sarnin, Janesville, aged 3 years.

April 26—John D. Bestwick, Janesville, aged 14 years.

April 26—Elizabeth Hollins, Janesville, aged 5 years.

ANA!—Dentists who have tried "Tea BERRY," pronounce it the finest thing on the face of this earth for the teeth and breath. 25 and 20 cents. Sold by Prehn & Breunson.

Slaughter House Fire.

This morning at three o'clock, the slaughter house belonging to Mr. Thomas Madden, located at the foot of South River street, in the fourth ward, took fire, and was totally destroyed,—no alarm being given, although the fire was seen by many people who were out at that hour. The building had been unoccupied for the past year, but was used as a storehouse for kettles, and such tools as are generally used in a slaughter house. For some time past it had been a sort of rendezvous for a mob of hoodlums, who were in the habit of purchasing beer by the keg, and taking it to this building for the purpose of having a spree and playing cards, and no fastenings which the owner was able to put upon the doors and windows, seemed to keep these roughts from gaining entrance. The building was valued at two hundred dollars. The amount of insurance, if any, is not known. Mr. Madden residing near the institution for the blind, has not been in the city to-day, consequently his exact loss could not be ascertained.

The west side engine company hitched their team, and made ready for a start for the fire, but upon being informed that it was the circus men burning the straw and rubbish of their migrating city, the boys did not proceed, nor give an alarm.

The New Cotton Mill.

The building of the new cotton mill at Monterey is progressing rapidly. The brick work on the first story is well under way, and in the course of six weeks the walls will be ready for the roof. The main building is 274 feet long and 74 feet wide, with an addition of fifty feet square for the wheel house and picking room.

The machinery will be ordered at once, much earlier than was at first thought to be necessary. Some of it will arrive early in the summer, and it will not be long after that before much of it will be put in operation. The mill will contain 300 looms and in all respects will be one of the very finest cotton factories in the United States. The machinery will be the latest and the best, and the goods coming therefrom will not be surpassed by any in this country.

Charlotte Thompson.

Charlotte Thompson and her excellent troupe arrived this afternoon, from La Porte, Indiana, and are registered at the Myers' house. The play this evening will be one of unusual interest, and beside that the national reputation of Miss Thompson should fill every seat in the opera house. The play not only ranks high, pure in tone and abounding in rich comedy and interesting situations, but the star is one of the brightest on the American stage. Give her a full house, and thus show appreciation of a masterpiece of dramatic art, and the star who has created a play.
